DEPARTMENT OF COMPUTER SCIENCE & IT

The Department of Computer Science and IT was established in the year 2000 with the objective of imparting quality education in the field of computer science. The form of technology and computers are being used in verious day to day applications such as Engineering, Pharmacy, Edution, E-Commerce, Business, Media, Music and Defence etc. Computers are an integral part of the society and should learn the computer education.

The department has modern facility for teaching, learning and research. It has well equiped computing laboratories and rich repository of software covering wide spectrum of applications. It also promotes active industry institute collaboration. Our faculty members are dedicated in providing our students with the best possible education by offering courses in the latest technology and providing attention and support that is needed to produce talented graduates and post graduates in the field of computer science. The institution offers the UG computer courses such as B.Sc. (Computer Science), BCA and M.Sc. (Software Engineering) as a PG course.

These courses provide knowledge of various computer programming languages and computer technologies like C, C++, VC++, JAVA, Oracle 11G, VB.NET, C#, Linux, Matlab, Neural Networks, etc.

DEPARTMENT OF
BIOTECHNOLOGY & BIOINFORMATICS

Biotechnology, emerged as an area of activity having potential impact on virtually all domains of human welfare, ranging from human health, protecting the environment to agriculture based industries and rapid development in the field of biotechnology includes new dimensions everyday.

The Biotechnology helps the students to find the employment in Biotech companies, Healthcare, Pharmaceuticals, Agriculture based industries, Food, Beverages industries, Environment and energy sector. Biotechnologists are required in research and development, production, quality control, management, marketing, contract research, academics and entrepreneurship. Global career opportunities in the field of Science & Technology are available for Biotechnologists. In India more than 1000 government and private research institutes and industries seek the trained professionals in the dynamic world of Biotechnology.

Bioinformatics is the exciting field that integrates Life Sciences (Biology) with Computer Technology. The recent explosion of available biological data creates all increasing demand, which far exceeds the supply for skilled Bioinformatics scientists with comprehensive training in both Biology and Computer Science.

Dr. Makarand N. Cherekar (M.Sc. PhD)
Head
Department of Biotechnology & Bioinformatics

Current advances increase the need for the creation of new and innovative bioinformatics tools. Unique computational tools open a vast potential for new scientific discovery, with the ultimate goal of understanding and modeling living systems. The Bioinformatics industry is growing rapidly with increasing career opportunities throughout the world.
